Salary (in USD)	500/
Industry	Drilling / Rig
Sub Industry	
Nationality	Pakistan
Primary Language	English,
Secondary Language	
Total Years of Experience	5

Additional Information

Roles and Responsibilities	Additional Skills/Certification
As a driller, my primary responsibility is to operate and maintain drilling equipment to extract natural resources such as oil, gas, and water. My day begins with conducting pre-operational checks on the drilling rig, ensuring all equipment is in good working condition. During drilling operations, I closely monitor the rig's systems, including mud pumps, drill pipes, and drill bits. I adjust drilling parameters as needed to optimize drilling efficiency and safety. I also collect and analyze data on drilling performance, making adjustments to improve results. Maintaining a safe working environment is paramount. I ensure compliance with safety protocols, conduct regular risk assessments, and participate in emergency response drills. I also supervise and train junior crew members to ensure they are competent in their roles. Effective communication with the drilling team, engineers, and other stakeholders is crucial to ensure smooth operations and address any challenges that arise.	Non core and coring

Education Summary

Course	University	Passing Year	Country
