manage a team of workers on an oil rig or T manage a team of workers on an oil rig operations in safe manners by protecting the crew safely and the rig equipments , achieving the operator drilling operations programs as per contract without any major issues with all contractors rules and procedures process. integrates all the optimal responsibilities, knowledge of different oil drilling technologies processes, and the prowess required to become one. Let's first take a quick look at his responsibilities. Let's read more about life on an oil rig to get the whole picture. Tool Pusher job description & responsibilities Demand For The Profession Very in demand The tool pusher profession is considered very popular in the oil and gas labor market. Many oil and gas companies need qualified specialists in this field because the industry is developing rapidly, and specialists are still being educated. The Job Uniqueness Rare profession Working as a tool pusher is rare in our time. Not everyone will be able to become a successful one. Employers have a high demand for specialists in this field, so a Toolpusher has the right to be called a rare profession. Working Environment Because the drilling process can't be stopped, most toolpushers work 12 hours per day, 7 days per week. Most toolpushers working for major oil & gas companies are remote, working at international and offshore rig locations, which will force them to leave home for a long time. Tool Pusher Duties and Responsibilities As a supervisor in a drilling rig, a tool pusher primarily renders adequate guidance and direction to the rig crew on specific tasks to ensure smooth and efficient drilling operations. He has full authority to oversee all drilling activities and enforce productivity standards to meet. As a specialist, he should perform the following Tool Pusher responsibilities. Administrates all drilling work practices and rig operations to ensure that all the activities meet the performance criteria, contractual requirements, and mandatory rules and regulations. Directs the drilling crew in rig moving operations; instructs the team to erect, dismantle, and lift drilling rigs Types and ensures safe working conditions on the rig site. Ensure employees have sufficient rig components, spare parts, and tools for efficient operations. Manages and assists in setting up and operating power units, draw works, and other drilling apparatus. The tool pusher should direct and coordinate the crew mixing, drilling, and circulating mud in the borehole and utilizing particular mud weights to avoid blowouts .

H2S , IWCF 4 ,
