## Personal Information

<b>Candidate id</b>	2839
<b>Name</b>	Danish Aksar
<b>Date of Birth</b>	1989-09-09
<b>Salary (in USD)</b>	4000/Per Month
<b>Industry</b>	Drilling / Rig
<b>Sub Industry</b>	OIM
<b>Nationality</b>	Pakistan
<b>Primary Language</b>	Hindi,
<b>Secondary Language</b>	English, Arabic,
<b>Total Years of Experience</b>	13

## Additional Information

<b>Roles and Responsibilities</b>	<b>Additional Skills/Certification</b>
-----------------------------------	--

A driller's responsibilities center around the operation and maintenance of drilling equipment to extract resources like oil, gas, or water, or to create boreholes for construction or geological surveys. They manage drilling operations, ensuring safety, efficiency, and adherence to regulations. Key Responsibilities: Equipment Operation and Maintenance: Drillers operate and maintain drilling rigs and related equipment, including hoisting equipment, pumps, and tools. Drilling Operations: They supervise the drilling process, monitor drilling parameters, and make adjustments as needed to ensure efficient and safe drilling. Safety Compliance: Drillers are responsible for enforcing safety regulations, preventing accidents, and ensuring all crew members adhere to safety procedures. Crew Management: They may supervise and delegate tasks to other members of the drilling crew. Record Keeping: Drillers maintain records of drilling progress, geological data, and equipment maintenance. Communication: Effective communication with geologists, engineers, and other team members is crucial. Problem Solving: Drillers must be able to identify and address issues that arise during drilling operations, such as equipment malfunctions or changes in drilling conditions. Material Handling: They handle drill rods, augers, and other downhole tools, as well as manage materials and supplies. Site Preparation: Drillers may be involved in preparing the drilling site, including setting up the rig and ensuring proper alignment. Core Sample Collection: In some cases, drillers collect core samples for geological analysis. Well Control: They may be responsible for pressure testing well control equipment and responding to wellbore influxes. Emergency Response: Drillers must be prepared to respond to emergencies, such as equipment failures or hazardous gas detection.
