Sub Industry	IT - Sys Admin C Support
Nationality	India
Primary Language	English, Hindi,
Secondary Language	
Total Years of Experience	1

Additional Information

Roles and Responsibilities	Additional Skills/Certification
----------------------------	---------------------------------

At Silver Touch Technologies, I work as a Software Developer where I am responsible for designing, developing, and maintaining dynamic and responsive web applications. My work primarily involves using technologies such as HTML, CSS, JavaScript, PHP, and the Laravel framework to build interactive and efficient websites that meet both user and business requirements. I focus on writing clean, reusable, and scalable code to ensure long-term maintainability and performance optimization. I am also involved in integrating MySQL databases for managing and storing application data efficiently, ensuring smooth communication between the front-end and back-end systems. My role includes testing, debugging, and troubleshooting to identify and resolve performance or functionality issues, thereby improving the reliability and stability of applications. Collaboration is a key part of my responsibilities — I often work closely with designers, testers, and other developers to implement new features and enhance existing ones. This experience has strengthened my understanding of the software development lifecycle, version control, and best coding practices. Through this role, I have developed strong technical, problem-solving, and analytical skills, and gained valuable experience in delivering high-quality, user-friendly web applications aligned with modern web standards and client expectations.

• HTML • Bootstrap •
Pandas Experience •
CSS • SQL • Laravel •
JavaScript • MongoDB •
PowerBi • React.js •
Python • VS Code
