Remediation Specialist – Enshaat Al Sayer / KOC, Kuwait (Dec 2022 – Present) Evaluate contaminated soil and identify the type and extent of pollution. Implement and calibrate remediation techniques such as bioremediation and soil washing. Collect and analyze soil and water samples to assess treatment performance. Prepare technical reports, soil logs, and stratigraphic profiles. Ensure compliance with KOC HSE requirements and act as an approved PTW holder. Mud Logger – Weatherford / KOC, Kuwait (Mar 2020 – Dec 2022) Collect, process, and describe geological samples during drilling operations. Operate and maintain real-time monitoring and data acquisition systems. Prepare daily reports and communicate geological interpretations to the drilling team. Ensure proper HSE practices and quality standards at the well site. Geologist – SEMATCO Co., Kuwait (Mar 2017 – Mar 2020) Conduct geological investigations for water well drilling projects. Perform physical, chemical, and engineering tests on soil and rock samples. Classify soil and rock formations and prepare detailed geological reports. Maintain accurate site and laboratory records for data reporting. Geologist – Tharwa Petroleum Co., Egypt (Aug 2014 – Feb 2017) Provide geological supervision during drilling operations. Analyze drilling cuttings and prepare lithological descriptions. Maintain geological logs and daily drilling reports. Support operational planning through real-time geological interpretation.
