Total Years of Experience	30

Additional Information

Roles and Responsibilities	Additional Skills/Certification
----------------------------	---------------------------------

An experienced and skilled slickline operator plays a critical role in well intervention and reservoir management operations. The operator is responsible for deploying and operating slickline tools and equipment to carry out programmed tasks such as setting and retrieving downhole devices, conducting surveys, and performing maintenance activities within oil and gas wells. Key responsibilities include supervising the slickline crew to ensure efficient execution of operations, coordinating daily activities, and maintaining clear communication across the team. The operator must ensure all tasks are completed according to operational plans while adhering strictly to safety regulations and industry best practices. This role demands a strong understanding of wellbore mechanics, tool functionality, and pressure control procedures. The operator is also expected to inspect and maintain equipment, troubleshoot issues, and ensure readiness for field deployment. Leadership, attention to detail, and a commitment to safety are essential qualities for success. In addition, the slickline operator must document operational data, report anomalies, and contribute to continuous improvement efforts. By ensuring precision and safety in every task, the operator supports optimal well performance and contributes to the overall success of field operations.

- International Well Control Forum (Level 4) - Basic Personal Survival at Sea and HUET - Wireline Technology & Safety Course 1 - Rigging up the Mast and rigging down - Caledyne Retrievable Bridge Plug - Supervisor Level Course
