201, Creado, Juhu Chruch Road, Juhu Mumbai 400049

## Personal Information

Candidate id	4002
Name	MOHAMED MOBARAK ALI
Date of Birth	1991-10-15
Salary (in USD)	2500/Per Month
Industry	Drilling / Rig
Sub Industry	Motorman
Nationality	Egypt
Primary Language	Arabic,
Secondary Language	English,
Total Years of Experience	15

## Additional Information

Roles and Responsibilities	Additional Skills/Certification
----------------------------	---------------------------------

I have a good experience in drilling wells and health and safety. I have experience in communicating with my colleagues. Drilling a well cost-effectively while maximizing penetration rate and performance. Evaluate outstanding pipe problems and avoid potential problems by improving well cleaning and penetration rate (ROP). Design of fossil columns, BOP/head systems and effectively implement drill and hydraulic programs. Understand BHA design for correct control of deviation, directional drilling, and horizontal drilling. Identify and evaluate well control problems using the principles and techniques of drilling fluid recording. Apply practical solutions to analyze and solve drilling problems that occur during operations. Drilling problems: Understand issues such as stuck pipes and fluid loss. The impact of well cleaning on drilling problems and improved penetration rate (ROP). Types of suspended pipes and their solutions. Fishing tools and techniques for dealing with outstanding pipe problems. Fluid loss: types and solutions to this common problem. A new technique in installing plugs to repair fluid loss and maintain the integrity of the well. Well control: understanding the stages and the importance of controlling the pressure inside the well. Disasters resulting from well failure: causes, detection, and effective control methods using drilling fluid recording techniques. Hydrodynamic pressure: how it affects drilling and well control strategies. Disaster handling procedures: The best closing methods for different problems using the well control method for diggers. Third line of defense: prevention and detection of underground well leaks. Thank you
