201, Creado, Juhu Chruch Road, Juhu Mumbai 400049

Personal Information

Candidate id	4124
Name	Odheyibo Oghenero
Date of Birth	1994-12-19
Salary (in USD)	1000/Per Month
Industry	Production
Sub Industry	Production Operator
Nationality	Nigeria
Primary Language	English,
Secondary Language	English,
Total Years of Experience	7

Additional Information

Roles and Responsibilities	Additional Skills/Certification
----------------------------	---------------------------------

As a Senior Mechanical Technician in a gas processing plant and oil & gas facility, I am responsible for leading mechanical maintenance activities to ensure safe, reliable, and efficient operations. I perform routine and preventive maintenance on rotating and static equipment such as gas compressors, pumps, heat exchangers, valves, pressure vessels, and piping systems. My role includes diagnosing equipment faults, troubleshooting mechanical failures, and implementing corrective actions to minimize downtime and maintain production targets. I oversee equipment installation, alignment, commissioning, and functional testing while ensuring compliance with industry standards and OEM specifications. I coordinate closely with operations, instrumentation, and HSE teams to plan and execute maintenance tasks, shutdowns, and turnarounds in line with safety procedures and work permits. I mentor junior technicians, review maintenance reports, and ensure accurate documentation of work orders through the CMMS. I support reliability improvement initiatives, including vibration monitoring, root cause analysis, and equipment performance optimization. I ensure strict adherence to safety regulations, environmental policies, and regulatory requirements at all times. Through strong technical expertise and hands-on experience, I contribute to maintaining plant integrity, reducing equipment failures, and ensuring continuous, safe, and efficient gas processing and oil & gas operations
