Additional Information

Roles and Responsibilities	Additional Skills/Certification
-----------------------------------	--

An assistant driller's job responsibilities include assisting the driller with daily operations, operating and maintaining drilling equipment, and ensuring safety protocols are followed. Key tasks involve rigging up and down equipment, monitoring drilling parameters and well conditions, and handling tools and tubulars. They are also responsible for record-keeping and supervising floorhands. Drilling operations and maintenance Assist the driller in operating the rig, including controlling pumps and drilling equipment. Handle and assemble/disassemble drilling tools, pipes, and other equipment. Perform routine maintenance on equipment, such as greasing and cleaning, and conduct simple repairs. Monitor drilling fluid circulation and assist in the operation of mud pumps. Monitor well conditions, such as mud weight and pressure, and make adjustments as needed. Safety and compliance Adhere to all health, safety, and environment (HSE) regulations and participate in safety meetings and drills. Ensure the work area is clean, tidy, and hazard-free. Follow company policies and the client's drilling plans, and participate in hazard management activities. Record-keeping and reporting Complete and maintain accurate daily drilling reports and other required paperwork. Record data on tubulars, tool dimensions, and fluid displacement. Collect and document core samples. Ensure all tools and equipment are properly accounted for. Supervision and communication Supervise and mentor floorhands and other crew members on equipment and procedures. Communicate effectively with the driller and other crew members to coordinate activities. Report any operational deviations or issues to senior staff.
