Industry	Oilfield Services
Sub Industry	Dispatcher
Nationality	Egypt
Primary Language	Arabic,
Secondary Language	English,
Total Years of Experience	4

Additional Information

Roles and Responsibilities	Additional Skills/Certification
----------------------------	---------------------------------

As a Coiled Tubing Field Engineer, my core responsibilities include planning and executing coiled tubing operations in a safe, efficient, and professional manner. I am responsible for preparing equipment for each job, performing detailed pre-job inspections, verifying pressure control equipment integrity, and ensuring that all tools and components are properly rigged up according to company standards and industry guidelines. I monitor well parameters throughout the operation, including pump rates, pressures, fluid characteristics, and depth control, to maintain optimal performance and avoid operational risks. I support a variety of CT operations such as stimulation, cleanout, fishing, nitrogen lifting, milling, and wellbore interventions, ensuring that each task is carried out with precision. I work closely with supervisors, the rig crew, and other service teams to coordinate all job activities and maintain smooth workflow at the wellsite. Communication is key, and I provide clear updates on operational progress, challenges, and any required adjustments. Additionally, I am responsible for documenting job data, preparing reports, and ensuring compliance with all HSE procedures. Maintaining a safe working environment is a top priority, and I consistently follow safety protocols, participate in hazard assessments, and take immediate action to mitigate risks. My role ensures both operational excellence and safe job execution.

Coiled Tubing Operations
Well Control
(IWCF/IADC) Pressure
Control Handling H2S
Awareness Basic
Hydraulic Systems Strong
HSE Awareness
Teamwork &
Communication
