Total Years of Experience	4

Additional Information

Roles and Responsibilities	Additional Skills/Certification
----------------------------	---------------------------------

My responsibilities include performing daily site inspections to ensure all work activities are conducted safely and in compliance with company standards and industry regulations. I continuously monitor the work environment, identify hazards, and take proactive steps to eliminate or control risks before they lead to incidents. I conduct detailed risk assessments for different tasks, evaluating the likelihood and severity of potential hazards, and implement appropriate control measures based on the hierarchy of controls. Another key responsibility is incident investigation. Whenever an incident or near miss occurs, I carry out a thorough investigation to determine root causes and recommend corrective and preventive actions to avoid recurrence. I also prepare clear and accurate reports, including daily, weekly, and monthly HSE documentation, which highlight safety performance, observations, trends, and recommendations. In addition, I deliver safety awareness sessions and toolbox talks to workers and supervisors to reinforce safety culture and ensure everyone understands the hazards related to their tasks. I actively participate in implementing emergency response procedures, ensuring that workers are trained and prepared to respond effectively to any emergency situation. Overall, my role focuses on maintaining a safe working environment, reducing risks, and promoting strong QHSSE performance across all operations.

Certified in First Aid, H2S, Firefighting, NEBOSH Award, and Process Safety. Skilled in risk assessment, hazard control, incident investigation, emergency response, environmental monitoring, and working under pressure with strong teamwork.
