| Crane operator Perform pre-operational safety checks on the crane, including the hook, rigging, and load capacity. Review lift plans and discuss work instructions with the team. Ensure the lift area is clear and safe before beginning operations. Collaborate with other professionals, like riggers and banksmen, to ensure loads are properly rigged and balanced. Safely lift and move heavy equipment and materials, such as unloading supply vessels or positioning modules. Communicate clearly with ground personnel using hand signals or radios to ensure coordinated and safe movements. Monitor crane stability, load weights, and adverse conditions like wind and sea state, especially offshore. Halt operations immediately if any unsafe conditions are detected. Be aware of the crane's swing radius, overhead hazards, and personnel movement around the worksite. | I can handle all work very softly ? |
