Industry	HSE
Sub Industry	Safety Officer
Nationality	India
Primary Language	English,
Secondary Language	Hindi,
Total Years of Experience	19

Additional Information

Roles and Responsibilities	Additional Skills/Certification
----------------------------	---------------------------------

As an HSE Engineer working in ADNOC Offshore, my core responsibilities include the implementation, monitoring, and continuous improvement of Health, Safety, and Environmental management systems in line with ADNOC HSEMS, Codes of Practice, and project-specific HSE plans. I ensure full compliance with ADNOC, client, and statutory HSE requirements across offshore operations, including wellhead platforms, maintenance, and construction activities. My role involves conducting regular HSE inspections, audits, and risk assessments to identify hazards and ensure effective control measures are in place. I actively monitor high-risk activities such as Permit to Work (PTW), SIMOPS, lifting operations, hot work, confined space entry, working at height, and marine operations. I also verify the safe use of tools, equipment, lifting gears, and PPE through inspections and color-coding systems. Additionally, I lead safety inductions, toolbox talks, emergency drills, safety campaigns, and workforce awareness programs to promote a strong safety culture. I investigate incidents, near misses, and unsafe acts, prepare reports, and ensure timely close-out of corrective and preventive actions. I work closely with operations, contractors, and marine teams to provide HSE guidance, conduct safety observations and stop-work interventions, and support emergency response preparedness to maintain a safe and environmentally responsible offshore workplace.

I specialized in HSE management systems, audits, risk assessments, and incident investigation, supported by NEBOSH IGC, IOSH, OPITO T-BOSIET, with a Mechanical Engineering background
