## Additional Information

<b>Roles and Responsibilities</b>	<b>Additional Skills/Certification</b>
-----------------------------------	--

Rig Electrician & Electromechanical Technician specializing in drilling operations and industrial power. Experience across offshore and land rigs (1500–2000 and 3000 HP) with strong focus on PM/CM, rapid fault diagnostics, and commissioning of VFD-driven packages—top drive, drawworks, mud pumps—plus BESS backup systems, generators, switchboards, and AC distribution up to 600 V. Track record of reducing NPT while maintaining strict HSE discipline and full compliance with IEC/IEEE/NEC standards. As Project Manager / Chief Electrician, deliver end-to-end power projects: MV/LV substations, pumping stations (MCCs ?1600 A; pumps ?380 HP), metering rooms, LED retrofits, grounding and certification, on-grid PV, and selective HV scopes. Responsibilities cover scope definition, procurement coordination, pre-commissioning and commissioning, QA/QC, RAMS/PTW, technical documentation, and final handover—working closely with the Electrical Engineer to ensure design intent, safe execution, and reliable performance. Comfortable leading crews and vendors, interpreting schematics, and aligning maintenance strategies with operational targets. Known for hands-on troubleshooting, clean documentation, and steady communication with rig management to protect uptime, extend asset life, and deliver measurable operational improvements.
