## Personal Information

|                           |                         |
|---------------------------|-------------------------|
| Candidate id              | 5296                    |
| Name                      | Mohamed Abdallah Yossef |
| Date of Birth             | 1984-04-18              |
| Salary (in USD)           | 7000/Per Month          |
| Industry                  | Drilling / Rig          |
| Sub Industry              | Rig Electrician         |
| Nationality               | Egypt                   |
| Primary Language          | Arabic,                 |
| Secondary Language        | English,                |
| Total Years of Experience | 18                      |

## Additional Information

|                            |                                 |
|----------------------------|---------------------------------|
| Roles and Responsibilities | Additional Skills/Certification |
|----------------------------|---------------------------------|

Effectively and safely drilling and complete oil and gas wells in different countries including ( Egypt- Saudi Arabia - Iraq) in both onshore and offshore environments. Performed different workover activities for naturally flow and artificial lifted wells ( sucker rod- ESP- PCP) ? On-scene company representative supervising drilling & service contractors. ? Coordination of the timely supply of required equipment, consumables and specialist services to ensure uninterrupted continuation of operations. ? Ensures that the project's activities take place in accordance with current laws, regulations, requirements and guidelines. ? Follow-up, optimize the cost & Conduct studies to improve performance. ? Provide sufficient, accurate and timely data to the Head office. ? Perform Daily Drilling reports for all Activities. ? Prepare Well Equipment List and manage the logistics as required. ? Provide Guidance For Less Experienced Engineers. ? Acquire Planning Data From Geology, Reservoir Engineering Or Geophysics. ? Carry Out Offset Well Data And Site Survey Analysis. ? Identify Possible Drilling Hazards And Discuss With Relevant Parties. ? Provide Initial Well Timelines For Planning Purposes, Drilling Time Curves And Initial Cost Estimates. ? Follow Up Well-Path Design & Directional Planning Execution. ? Design Well Hydraulics, Recommend Flow Rates for Drilling. ? Optimize And Recommend Bits To Be Run In Drilling Program and Prepare Well Bit Records. ? Recommend Means of Avoiding Drilling Problems Such As How to Ensure Well bore Stability, Lost Circulation and Stuck Pipe. ? Calculate Kick Tolerances. Design Well Kill Plan. ? Work With Various Service Vendors To Ensure Plans Are Achievable/Implemented. ? Monitor Implementation of Programs. ? Optimize The Drilling Program And Identify Ways Of Reducing The Well Costs. ? Ensure Well Performance Data Such As Planned verses Actual Drilling Time Curve, Drilling Cost/Ft, Footage per Day, Planned verses Actual Well Costs.

IWCF BOSIET

## Education Summary

| Course | University      | Passing Year | Country |
|--------|-----------------|--------------|---------|
| Msc    | Suez university | 2006         | Egypt   |

## Career Summary

| Position            | Employer  | Country | From    | To      |
|---------------------|-----------|---------|---------|---------|
| Drilling supervisor | Anton oil | Iraq    | 05/2023 | 12/2025 |
