Additional Information

Roles and Responsibilities	Additional Skills/Certification
----------------------------	---------------------------------

- Review Contractor Risk Assessment and enforce preventative measures
- Initiate and organize OHS training of employees and executives
- Inspect premises and the work of personnel to identify issues or non-conformity (e.g. not using protective equipment)
- Stop any unsafe acts or processes that seem dangerous or unhealthy.
- Provides advice and consultation to department staff on maintaining a safe working environment in compliance with environmental and safety regulations, standards, and practices.
- Coordinated with KNPC Project Team, Operation Team and contractors to ensure safe dismantling of high-risk equipment including columns, reactors, furnaces, pipelines, and storage tanks.
- Identifies and evaluates hazardous conditions and practices in the workplace, conducting surveys to assess occupational health, safety, and environmental conditions.
- Implemented hazard control measures for asbestos handling(if any), hydrocarbon residues, confined spaces, and heavy lifting operations.
- Ensured safe waste management and disposal of hazardous materials in compliance with local environmental laws and international best practices.
- Coordinates on-site inspections to audit physical conditions and safe work practices, offering guidance on compliance with corporate safety regulations and procedures.
- Conducts safety inspections at construction/demolition sites and department facilities, including hazard analyses and safe work procedures, and prepares written reports with recommendations.
- Develops controls for identified hazards and coordinates their implementation based on hazard analyses results. Measures and evaluates the effectiveness of hazard control systems, policies, and procedures, recommending improvements to reduce workplace incidents and injuries.
- Participates in Safe Operations Committee meetings
- Reviews and analyzes injury, property damage, and statistical loss data, working with management to create comprehensive recommendations for corrective actions to eliminate or minimize potential hazards.
- Ensures essential safety requirements are incorporated into all purchasing and contracting actions, recommending the purchase of safety equipment, supplies, and personal protective equipment (PPE) in accordance with company requirements.
- Performs other related duties as directed by the HSE Engineer.
