----------------------------	---------------------------------

A dedicated medical doctor with over 4 years of experience and professional training in emergency medicine. I bring both the clinical expertise and the practical experience needed to provide high-quality medical support in remote drilling operations. In my previous role as a Rig Medic with Charlvon Limited and Geoplex Drillteq Limited respectively, I managed on-site healthcare for crews working in challenging and isolated environments where i provided primary care, emergency stabilization, and coordinated evacuations when required. My ability to remain calm under pressure and deliver evidence-based care has directly contributed to improved outcomes in critical situations. Moreso, I understand the unique demands of rig-based work, including long shifts, diverse crews, and the need for proactive health and safety practices. I have been recognized for supporting HSE teams and promoting occupational health initiatives to reduce downtime and safeguard crew welfare. My capabilities include but not limited to: - Delivering 24/7 medical care and emergency response to a crew of 190+ rig personnel, managing illnesses, injuries and trauma cases with precision in a remote environment. -Execute medevac operations according to the company's outlined emergency response plan when necessary. -Train and mentor teams on first aid and other health and safety protocols. -Manage medical inventory, equipment and other clinic services ensuring functionality. -Conduct weekly hygiene and food inspections and servicing of the eye wash stations & first aid kits. - Enhance crew preparedness by partnering with HSE teams to conduct emergency drills, safety inspections and support incident investigations.

Skills: Rig healthcare proficiency
