| Roles and Responsibilities | Additional Skills/Certification |
|-----------------------------------|--|

As a Drilling Engineer at GUPCO, I have been involved in planning and executing vertical, deviated, and horizontal wells, including development, exploratory, and sidetrack operations. I am proficient in EDM applications such as COMPASS, WELLPLAN, and STRESSCHECK for trajectory design, hydraulics optimization, and casing design. My responsibilities included designing casing, BHA, and mud programs, forecasting drilling costs, and monitoring KPIs to ensure cost control, operational efficiency, and compliance with company and industry standards. In parallel, my offshore role as a Drilling Supervisor strengthened my operational leadership and wellsite decision-making capabilities. I supervised drilling, completion, workover, and well intervention operations, ensuring adherence to approved programs, well trajectory compliance, effective hole cleaning, and BHA optimization. I prepared and issued Daily Drilling Reports using LANDMARK OpenWells, coordinated daily instructions to rig crews, and maintained continuous communication with onshore teams regarding risks, well conditions, and mitigation actions.

International Well Control Forum school (IWCF - Level 4). Stuck Pipe Prevention. EDM Landmark Training. Cementing School. HUET (Helicopter Under Water Escape Training). OSHA General Industry and Construction. Basic Mud School.

Education Summary

| Course | University | Passing Year | Country |
|-----------------------|-----------------|--------------|---------|
| Petroleum Engineering | Suez University | 2019 | Egypt |
