Currently i am working as MPD Drilling Engineer, providing onsite and office support to customer. My role ranges from job planning to safely execution and evaluation. Prepare Planning Feasibility Report, Drilling Program, Operational risks, End of Well Reports, Cost and AFE Calculation and Tender Documents. Demonstrate strong working knowledge of operating and contingency SOPs, supervising their execution to ensure safe, efficient, and compliant operations. Maintain underbalanced well conditions by optimizing pump rates, N2, Foam and H2s scavengers' injection rates. Maintain continuous communication with the base office technical advisor to ensure alignment on operational performance and real-time decision-making. Utilize WellFlo multiphase flow software to calculate liquid, gas, and mixed-phase velocities, ensuring effective hole cleaning and advising stakeholders on any operational concerns. Assist Sales, Operations, and Product Engineering teams in managing their everyday responsibilities. Prepare Hydraulics simulations, Well Control Matrix, Procedures, provide onsite and office support for MPD, UBD, NBD and Air Drilling operations. Prepare kick response scenarios and MPD well control matrices based on system capabilities. Design P&IDs and flow diagrams for MPD piping, valve and cross overs. Participate in Job risk analysis (Customer DWOP), HSE & Service Quality communication with customers
