<b>Total Years of Experience</b>	10

## Additional Information

<b>Roles and Responsibilities</b>	<b>Additional Skills/Certification</b>
-----------------------------------	----------------------------------------

ensuring safe, efficient, and environmentally , implementing and monitoring the company's Health, Safety, Environment, and Asset Integrity (HSAE) management system in full alignment with client requirements, international standards, and local regulations. The advisor provides continuous HSE oversight of offshore activities, ensuring that all operations are conducted in accordance with approved procedures, Permit to Work (PTW) systems, Risk Assessments, and Job Safety Analyses (JSA/JHA). A key responsibility is identifying hazards, assessing risks, and verifying that effective control measures are in place, particularly during high-risk activities such as lifting operations, working at height, confined space entry, hot work, and drilling or well intervention activities. The Offshore HSE Advisor actively promotes a positive safety culture by engaging with the workforce through toolbox talks, safety meetings, inductions, and on-job coaching. The role includes monitoring compliance, conducting inspections and audits, and exercising Stop Work Authority when unsafe conditions or behaviors are observed. The advisor also leads or supports incident and near-miss investigations, performs root cause analysis, and ensures corrective and preventive actions are implemented and closed out effectively. In addition, the role supports emergency preparedness, ensuring readiness for fire, man overboard, well control, and abandon rig scenarios through regular drills and verification of life-saving and fire-fighting equipment. The Offshore HSE Advisor serves as the primary HSE interface between offshore crews, onshore management, and clients, contributing to continuous improvement and the overall protection of people, assets, and the environment.

Communication skills, BOSIET NEBOSH IGC
