Total Years of Experience	7

Additional Information

Roles and Responsibilities	Additional Skills/Certification
----------------------------	---------------------------------

With over 7 years of hands-on experience in offshore and onshore Oil & Gas and seismic operations, I have successfully supported major clients including Saudi Aramco, ADNOC, and BPCL while maintaining strict compliance with international and client-specific HSE standards. Throughout my professional career, I have been actively involved in implementing and monitoring QHSSE management systems aligned with ISO 9001, ISO 14001, and ISO 45001, as well as IOGP, IMCA, and IAGC guidelines. My experience includes conducting risk assessments, audits, incident investigations, permit-to-work monitoring, and management of change processes across high-risk operational environments. I consistently focus on proactive hazard identification, regulatory compliance, and continuous improvement to minimize incidents and protect people, assets, and the environment. I bring strong offshore and onshore safety exposure, having worked on seismic survey vessels, supply vessels, and refinery operations. I am experienced in promoting behavior-based safety culture through toolbox talks, safety campaigns, emergency response drills, and workforce engagement programs. My ability to communicate effectively with multinational teams, contractors, and client representatives has enabled me to support safe operations while meeting project timelines and performance expectations.

I am a NEBOSH IGC certified safety professional with additional certifications in IOSH, STCW, FOET, H2S, and Ship Security Officer training, Diploma in Fire and Safety engineering.
