Additional Information

Roles and Responsibilities	Additional Skills/Certification
----------------------------	---------------------------------

HSE roles involve protecting people and the planet by preventing accidents, injuries, and pollution through risk assessment, policy enforcement, training, inspections, and emergency preparedness, ensuring compliance with laws, and fostering a strong safety culture across industries like construction, oil & gas, and manufacturing. Key responsibilities include conducting safety audits, implementing safety protocols, managing permits, investigating incidents, and providing essential training, all while maintaining a safe, compliant, and environmentally sound workplace. Risk Management: Conduct Job Safety Analyses (JSAs), Hazard Identification (HAZID), and risk assessments for all work activities. Policy & Procedure: Develop, implement, and enforce site-specific HSE plans, policies, and emergency response protocols. Training & Awareness: Deliver safety inductions, toolbox talks, and specialized training (fire safety, first aid, PPE usage). Site Inspections: Perform daily walk-throughs to check for unsafe conditions, verify permits (hot work, confined space), and ensure proper PPE use. Incident Management: Investigate accidents/near-misses, determine root causes, and implement corrective/preventive actions. Documentation: Maintain accurate safety records, reports, permits, and safety data sheets. Compliance: Ensure adherence to local, national, and company HSE regulations and standards. Welfare: Ensure adequate first aid, sanitation, and emergency facilities are available. Environmental: Promote sustainable practices, manage waste, and monitor environmental discharges.
