## Additional Information

Roles and Responsibilities	Additional Skills/Certification
----------------------------	---------------------------------

Key Responsibilities include: Supported all phases of pre-commissioning, commissioning, and start-up of the DHDS unit, ensuring system readiness and alignment with project timelines. Monitored critical unit parameters, including temperature, pressure, and H<sub>2</sub>S levels, making timely operational adjustments to maintain stable and efficient process conditions. Performed routine field inspections and responded to process deviations, ensuring continuous, trouble-free operation of the unit. Conducted emergency drills and implemented shutdown/start-up procedures in accordance with standard operating procedures (SOPs). Collaborated with process engineers and maintenance personnel to diagnose and resolve technical issues, enhancing equipment reliability and minimizing downtime. Adhered to all safety protocols, environmental standards, and operational best practices, contributing to a zero-incident work environment. Managed field operations during shift handover, including status reporting, logbook updates, and coordination with control room personnel. Monitored process conditions and conducted routine inspections to ensure optimal unit performance and detect early signs of equipment malfunction. Executed operational adjustments, start-up, shutdown, and emergency procedures in accordance with SOPs and safety protocols. Prepared equipment for scheduled maintenance by coordinating isolation, depressurization, and gas freeing procedures. Collected operational data and maintained accurate records to support performance analysis and troubleshooting. Ensured compliance with housekeeping and HSE (Health, Safety & Environment) standards within the operating area.

Strong communication and team working ability
