Industry	Oilfield Services
Sub Industry	Mud Logging
Nationality	Malaysia
Primary Language	English,
Secondary Language	
Total Years of Experience	6

Additional Information

Roles and Responsibilities	Additional Skills/Certification
-----------------------------------	----------------------------------------

A dedicated Field Engineer specialising in Drilling and Completion Fluids with six years of oil and gas experience, seeking to transition into broader drilling operations roles. I have supported full well construction cycles, with strong capability in mud programme development, fluid mixing, troubleshooting, pit management, and daily operational reporting. My experience includes preparing mud programmes and operational plans for offshore and development wells such as Tukau 41ST & 42ST, Hadrah-1, Kumang East A6 & A7, Bokor-605, Dulang Redev 2, and Megah-1, with a solid understanding of project cost estimation and logistics coordination. I am actively involved in drilling fluids optimisation, wellbore strengthening, on-site service delivery, and cross-functional collaboration with drilling, subsurface, and service teams. I have also contributed to tendering and contract evaluations from the service provider perspective, strengthening my commercial awareness. I hold IWCF Level 4 and Level 2 Drilling Well Control (Surface & Subsea) certifications and Stuck Pipe Prevention certification, and I am committed to the highest HSE standards while delivering consistent operational performance.

IWCF Level 4
surface & subsea.

Education Summary
