Total Years of Experience	14

## Additional Information

Roles and Responsibilities	Additional Skills/Certification
----------------------------	---------------------------------

As a **Drilling Supervisor**, **my role and responsibilities** focus on ensuring that drilling operations are carried out safely, efficiently, and according to the approved drilling program. I am responsible for supervising all on-site drilling activities and making sure they comply with company policies, industry standards, and regulatory requirements. One of my key responsibilities is **maintaining safety** at the rig site. I ensure that all personnel follow safety procedures, conduct toolbox talks, and promote a strong safety culture to prevent accidents and environmental incidents. I closely monitor well control practices and take immediate action if any unsafe or abnormal conditions arise. I also **coordinate daily operations** between rig crews, contractors, service companies, and drilling engineers. This includes supervising activities such as drilling, tripping, casing, cementing, and logging to ensure smooth and efficient operations. Another important part of my role is **monitoring drilling performance and costs**. I track daily progress, identify operational challenges, minimize non-productive time, and implement corrective actions when needed. I am responsible for preparing accurate daily drilling reports and documenting operational activities. Additionally, I ensure **compliance with environmental and legal regulations**, protecting personnel, equipment, and the environment while delivering the well successfully.

IWCF
