-----------------------------------	--

I am a Mechanical Design Engineer with strong expertise in mechanical design, drafting, and manufacturing-oriented engineering solutions. I have hands-on experience in 3D modeling and 2D drafting using SolidWorks and AutoCAD, with a focus on design accuracy, manufacturability, and performance optimization. My technical background includes CNC programming and machining for milling, turning, and lathe operations, using Mastercam and Aspire, enabling me to translate designs into precise, production-ready components. I also possess solid experience in sheet metal fabrication and aerodynamic part design, ensuring structural integrity, functionality, and cost efficiency. I am skilled in welding, cutting, and surface finishing techniques, allowing effective coordination with fabrication teams and practical problem-solving during manufacturing and assembly stages. Additionally, I have experience in project planning and scheduling using Primavera P6 and MS Project, supporting timely project execution and resource optimization. Alongside my engineering capabilities, I have basic knowledge of cloud platforms (Azure and AWS) and strong technical documentation and reporting skills. I bring excellent problem-solving, team collaboration, and leadership abilities, enabling me to contribute effectively to multidisciplinary teams and deliver reliable engineering solutions in dynamic, results-driven environments.
