## Additional Information

Roles and Responsibilities	Additional Skills/Certification
----------------------------	---------------------------------

Supervised and managed coiled tubing operations at wellsite locations, ensuring all activities were performed safely, efficiently, and in full compliance with company policies and HSE standards. Led and coordinated field crews during rig-up, operations, and rig-down, providing clear instructions and technical guidance to ensure smooth execution of daily operations. Responsible for planning and executing coiled tubing jobs including well intervention, clean-out, stimulation support, pressure control operations, and equipment preparation. Monitored job performance, analyzed operational data, and implemented corrective actions when required to maintain operational efficiency and safety. Ensured all equipment, tools, and units were properly inspected, maintained, and certified prior to operations. Coordinated closely with maintenance teams to address equipment issues and minimize downtime. Maintained accurate job documentation, daily reports, and operational records in accordance with company and client requirements. Acted as the main point of contact between the company and clients at the wellsite, maintaining strong working relationships and ensuring customer satisfaction through professional service delivery. Conducted toolbox talks, safety meetings, and risk assessments to promote a strong safety culture among crew members. Supported training and mentoring of junior staff, promoting continuous improvement, teamwork, and adherence to best practices. Demonstrated strong leadership, problem-solving skills, and the ability to work effectively in high-pressure field environments.
