Passionate about optimizing well performance and ensuring safe, efficient drilling and workover operations, I bring a results-driven approach to the oil and gas industry. As a Field Engineer, I thrive in high-pressure environments, solving complex challenges in both onshore and offshore operations. With hands-on expertise in rig operations and production optimization, I have successfully contributed to projects that enhanced operational efficiency and reduced downtime. My ability to collaborate with cross-functional teams, adapt to evolving industry technologies, and implement best practices in well integrity has made a tangible impact on project success. Key Strengths & Achievements: ? Drilling & Workover Excellence – Ensured smooth execution of drilling and workover operations, improving production rates and minimizing non-productive time. ? Safety & Compliance Focus – Committed to HSE best practices, ensuring operations align with industry standards and regulations. ? Problem-Solving Mindset – Proven track record of troubleshooting operational challenges and optimizing drilling performance under demanding conditions.

Delivered efficient drilling and workover operations to boost production and reduce NPT, with strong HSE compliance and a proven ability to solve complex operational challenges and optimize performance.
