## Personal Information

<b>Candidate id</b>	6342
<b>Name</b>	Bahy Darwesh
<b>Date of Birth</b>	1997-03-03
<b>Salary (in USD)</b>	500/Per Day
<b>Industry</b>	Drilling / Rig
<b>Sub Industry</b>	Radioman
<b>Nationality</b>	Egypt
<b>Primary Language</b>	Arabic,
<b>Secondary Language</b>	English,
<b>Total Years of Experience</b>	5

## Additional Information

<b>Roles and Responsibilities</b>	<b>Additional Skills/Certification</b>
-----------------------------------	--

I serve as the primary onsite authority responsible for the strategic execution of complex drilling programs. My role is centered on the seamless integration of engineering objectives with field realities, ensuring that every phase of the well construction process—from initial positioning and leg pre-loading to reaching Total Depth (TD) and final completion—is conducted with absolute technical precision. Operating in the high-stakes offshore environment, I manage the critical interface between the rig's marine stability and downhole mechanical integrity, maintaining a constant vigil over wellbore stability, pore pressure gradients, and fluid hydraulics. Beyond technical oversight, I function as a high-level project manager and safety leader. I am responsible for the direct supervision of the Drilling Contractor and a diverse array of third-party service providers, including directional drillers, mud engineers, and cementing crews. My performance is measured by the ability to aggressively minimize Non-Productive Time (NPT) and "flat time" through meticulous forward planning and proactive risk mitigation. By conducting detailed "Look Ahead" meetings and Rig-Site Verification (RSV) audits, I ensure that all personnel adhere to stringent HSE Management Systems and Well Control protocols. Whether navigating the challenges of high-angle directional wells, managing complex casing strings, or troubleshooting unforeseen geological hazards, my focus remains on delivering a high-quality wellbore. I translate corporate KPIs into operational success, ensuring the asset remains on schedule and within budget while upholding the highest standards of environmental stewardship and personnel safety.
