Personal Information

| | |
|---------------------------|--------------------------------|
| Candidate id | 6429 |
| Name | IVAN ANDRES PRECIADO CIFUENTES |
| Date of Birth | 1995-02-22 |
| Salary (in USD) | 2000/Per Month |
| Industry | Engineering & Science |
| Sub Industry | Chemist |
| Nationality | Colombia |
| Primary Language | Spanish , |
| Secondary Language | English, |
| Total Years of Experience | 1 |

Additional Information

|----------------------------|---------------------------------|
| Roles and Responsibilities | Additional Skills/Certification |
|----------------------------|---------------------------------|

Supported process engineering activities across different stages of engineering projects, from initial design to execution and commissioning support. Performed detailed process analysis to ensure operational efficiency, safety, and compliance with applicable standards and client requirements. Prepared and reviewed technical documentation including Process Flow Diagrams (PFDs), Piping and Instrumentation Diagrams (P&IDs), process data sheets, design bases, and design criteria to support engineering deliverables. Assisted in process optimization activities by analyzing operating data, identifying improvement opportunities, and proposing technical solutions aimed at reducing cycle time, improving product quality, and enhancing overall process performance. Provided technical support to ongoing projects by coordinating with multidisciplinary teams such as mechanical, electrical, instrumentation, and project management, ensuring proper integration of process requirements. Participated in technical discussions with clients and vendors to clarify process specifications, review equipment proposals, and resolve technical queries. Supported the evaluation of technical offers, preparation of requisitions, and verification of vendor documentation to ensure compliance with project specifications. Contributed to the implementation of safety and quality standards by supporting risk analysis activities, including basic process safety reviews, operational procedures, and compliance checks. Assisted during commissioning and start-up phases by supporting system testing, troubleshooting operational issues, and ensuring smooth transition to stable operation. Maintained organized and up-to-date technical documentation, ensuring traceability, version control, and alignment with project and regulatory requirements. Demonstrated strong analytical skills, attention to detail, and effective communication while working under deadlines and contributing to continuous improvement initiatives within the engineering team.
