<b>Nationality</b>	Algeria
<b>Primary Language</b>	English,
<b>Secondary Language</b>	French, Arabic,
<b>Total Years of Experience</b>	9

## Additional Information

<b>Roles and Responsibilities</b>	<b>Additional Skills/Certification</b>
-----------------------------------	--

As an HSE Trainer on a \$5 billion refinery EPC construction project, I am responsible for designing, delivering, and continuously enhancing comprehensive health, safety, and environmental training programs for a diverse and multicultural workforce that includes employees, supervisors, and subcontractors. I conduct project HSE inductions, task-specific training, and refresher sessions focused on high-risk activities such as working at height, confined space entry, lifting operations, scaffolding, hot work, excavation, and strict permit-to-work (PTW) compliance. I ensure all training materials are aligned with project specifications, client requirements, international standards, and local regulations, while adapting the content to meet the practical realities of site operations. I evaluate workforce competency through written tests, practical assessments, and direct observation in the field, identifying gaps and implementing corrective training when necessary. In addition, I actively promote incident prevention by encouraging hazard reporting, participating in safety campaigns, supporting toolbox talks, and contributing to incident investigations to integrate lessons learned into future training sessions. I maintain accurate training matrices, certification records, and compliance documentation to support internal and external audits. By working closely with construction, engineering, and HSE teams, I help strengthen a proactive safety culture that prioritizes risk awareness, accountability, and continuous improvement throughout all phases of the project lifecycle.

Microsoft office,  
NEBOSH IGC, IOSH  
managing safely,  
OSHA train the  
trainer, OSHA 30  
hours.
